# LVT Backing Options & Availability

## intelli-force magnetix Magnetic Backing

- Design flexibility for use on both floors and walls
- Rapid seasonal, promotional, social distance messaging, modernization, replacement or repair of any floor or wall area
- Saves time in construction schedules, directly cutting costs
- Eliminates the need for moisture mitigation in floor substrates with up to 98% RH
- Isolates asbestos in well bonded asbestos flooring
- Roll-on magnetix coating directly applied to floor or wall for rapid installation
- Guaranteed lifetime magnetic performance
- Available for use on any subfloor

## Standard Backing

- 100% virgin vinyl flooring
- Phthalate Free
- Multiple stabilization core layers to improve stability
- Advanced ceramic bead coating system
- Easy to install, increased durability

## Acoustical

- Exceptional sound absorption
- No need for an additional underlayment and increased installation costs
- Meets or exceeds 55IIC rating over 6" concrete slab
- Covers minor surface irregularities on existing subfloors
- Fused construction will not separate
- Will not reduce static load ratings
